

# FieldAlytics

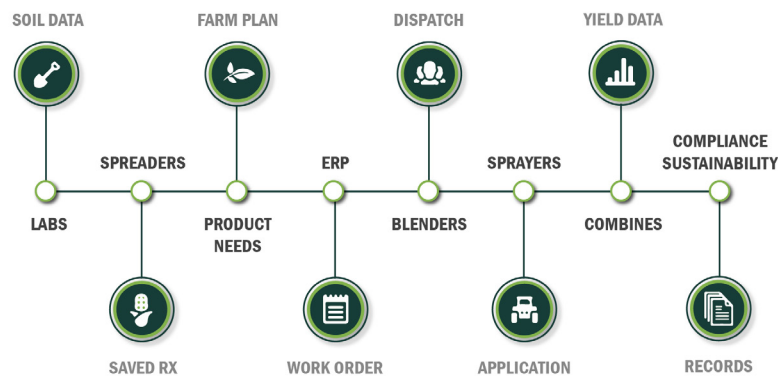

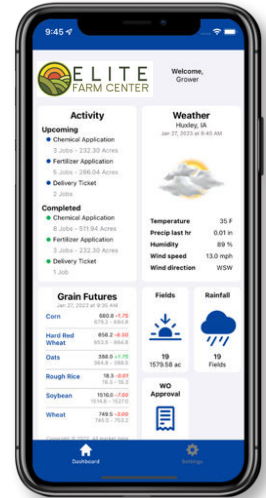

AN AGRONOMY OPERATIONS SOLUTION DESIGNED TO STRENGTHEN RELATIONSHIPS BETWEEN YOU AND YOUR GROWERS, HOUSING ESSENTIAL INFORMATION IN A SINGLE PLATFORM.

With FieldAlytics, you can easily connect with your customer by providing:

- Real-time information in the hands of you and your customer.
- Centralized field logistics and planning.
- Operational insights for improved profitability.
- Increase in labor efficiency.

By keeping growers connected to the activity on their farms, service providers can:

- Showcase the activity and applications completed by the service provider and allow the grower to collect their own records all in one place.
- Provide up to date scouting results as your crop scouts leave the field so the grower can make informed decisions on if additional actions are needed.
- Offer more insights into the current commodity market to view past, current, and future market trends to make data driven decisions.
- Efficiently manage risk with communication of crop area information gathered from the salesman or grower and directly provided to applicators.

Field Data is more valuable while on the move. Learn how a comprehensive digital agronomy solution can help you manage your agronomy operations, while providing the opportunity to elevate the farmgate conversation.
