

Feedlot IQ

Transforming Feedlot Data Into Decisions

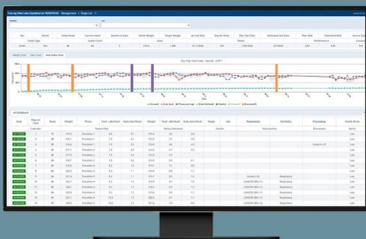

What is Feedlot IQ?

Feedlot IQ is an Artificial Intelligence driven feedlot management platform that brings health, feed, performance, weather, and financial data together into one connected view—helping teams make earlier, more confident decisions.

Built on **real-world feedlot data** and developed by Ever.Ag data scientists working alongside feedlot managers and **Production Animal Consultation (PAC)**, Feedlot IQ turns the information yards already capture into clear, practical intelligence.

Key Benefits

-  Predict emerging risks earlier with AI trained on real-world feedlot patterns.
-  See health, feed, performance, and weather changes in one unified view.
-  Act sooner and with confidence using timely, data-driven insights.
-  Strengthen feed efficiency and improve gain with tighter daily control.
-  Improve collaboration across managers, veterinarians, and nutritionists.
-  Build a more consistent, more profitable feedlot with proactive decision support.

“Having feed, health, and weather insights together in one view helps us anticipate performance shifts sooner. It sharpens our decision-making—not replaces it.”

— Feedlot IQ Advisory Customer

30%

of production losses
are tied to delayed
issue detection.

70%

of feedlot expenses
come from feed
—small gains matter.

20%

fewer health interventions
occur when problems
are caught early.

Core Capabilities

Health Intelligence

Feedlot IQ identifies emerging health risks earlier and helps teams time interventions more precisely by connecting real-world data with AI-driven alerts.

Feed & Intake Management

Feedlot IQ improves daily feed precision and consistency by monitoring intake patterns and optimizing transitions to support predictable performance.

Performance Insights

Feedlot IQ strengthens performance outcomes by combining historical trends, environmental data, and predictive modeling to reveal what's changing across the yard.

Weather-Driven Intelligence

Feedlot IQ links weather data to health, feed, and performance indicators to help operators anticipate stress and act ahead of conditions that affect cattle.

Financial Clarity

Feedlot IQ brings feed, health, performance, and market inputs together to clarify true cost drivers and support more confident margin decisions.
