

Livestock Procurement System

From Plan to Price to Payment in One Flow

Managing procurement is complex, and mistakes are costly. LPS provides a single system of record that reduces errors, improves accuracy, and strengthens compliance. The result is confidence in your numbers, greater audit protection, and faster, more reliable payments for producers.

Livestock Procurement System (LPS) is a cloud-based solution that simplifies livestock procurement for pork processing facilities, ensuring regulatory compliance in:

Origination

Traceability

Value Calculation

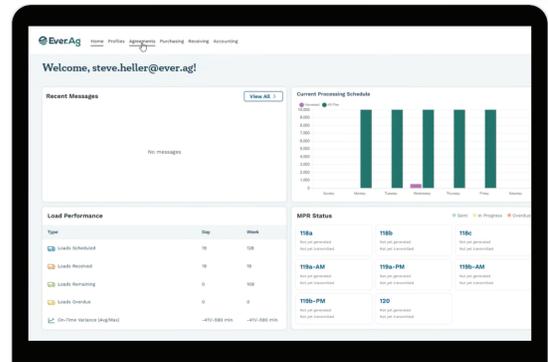

Settlement

Mandatory Price Reporting (MPR)

By eliminating the risk of errors and failed audits, you can focus on what matters most: running a profitable, resilient business.

Why choose LPS:

- One system of record that ensures consistency across the entire workflow
- Transparency in accurate transfer of information between packer and producer
- Audit-ready compliance under GIPSA, AMS, USDA, and Packers and Stockyards
- Fraud prevention through secure processes that reduce risk
- Time savings by automating repetitive and error-prone tasks

How LPS Delivers:

- Automate and safeguard Mandatory Price Reporting
- Guarantee accurate contract-based producer pricing and settlement with no errors, processed daily or multiple times daily to ensure accurate, contract-based producer pricing and settlements that can be processed once daily or multiple times throughout the day
- Eliminate scheduling errors in daily deliveries
- Strengthen compliance with built-in audit reporting

Potential Savings:

- Labor savings of \$50–60k annually through automated scheduling, saving 5–10 minutes per load
- Compliance efficiency with savings of 10+ hours weekly with automated MPR reporting
- Built in audit reporting and compliance safeguards
- Settlement efficiency with exception-based settlement management
- Real-time operations that prevent costly production delays

(Based on an example of 10,000 head harvested in a day for a non-vertically integrated supply.)

Who We Serve:

LPS supports processors of every size, from **500 head per day** to more than **100,000 head per day.**

Every operation benefits from improved efficiency and reduced audit risk.

Bridging the Technology Gap:

Legacy or homegrown systems cannot keep up with today's industry demands. LPS replaces outdated workflows with a secure, cloud-based solution that ensures speed, reliability, and regulatory peace of mind.

Transform your procurement process and stay ahead of the competition with Ever.Ag's industry-leading livestock procurement solution.
