

Commodity Management Systems for Rice Mills

**Purpose-Built Precision.
Profit-Driven Performance.**

Welcome to the only Commodity Management Systems (CMS) engineered exclusively for rice mills.

From paddy intake to packaging, CMS gives you the control to optimize every step, reduce manual errors, and unlock real-time insights—so you can run leaner, smarter, and more profitably.

Tired of workarounds and generic solutions? It's time to run your rice mill on a system built specifically for your crop, your contracts, and your customers.

BUILT-IN INTELLIGENCE. TANGIBLE IMPACT.

Integrated Accrual-Based Accounting

Eliminate double entry. Every transaction—from farmer contract to export—is auto-recorded and audit-ready.

Track drying, milling, and storage costs in real time to protect your margins per load.

End-To-End Lot Traceability

From raw paddy to retail packaging, monitor every lot through every stage.

Trace moisture levels, deductions, and by-products back to the exact truckload or grower.

Live Inventory & Position Reporting

Know what's in your silos, what's committed, and what's ready to move—right now.

Balance rough rice inventory and finished goods, reduce spoilage, and optimize space.

Advanced Contract Management

Purchase and Sales contracts.

Automated alerts, moisture-based pricing, and scale ticket integration = no missed terms.

Scale Integration + Ticket Processing

Gross and tare weights are auto-captured and converted into digital tickets with deductions applied.

No more paper errors, intake delays, or payment disputes.

Purpose-Built for Rice. Designed to Deliver.

This isn't a generic ag solution. CMS addresses the real-world complexity of rice mills—so you can boost yield, reduce waste, and meet every customer spec with confidence.

DEEP FUNCTIONALITY. DESIGNED FOR DAILY USE.

Rough Rice Processing & Yield Breakdown

Track and split incoming paddy into Head Rice, 2nd Head, Brewers, Bran, and Hulls. **Automatically log yields for each by-product and calculate resource utilization.**

Custom Blending & Packaging

Blend Head Rice and Brokeners to meet precise spec tolerances.

Create retail-ready or export blends based on quality grade and customer requirements.

Dynamic Pricing Models

Adjust prices in real-time based on grade, moisture, market shifts, and energy inputs.

Support premium pricing on specialty varieties with automated logic.

Export Documentation, Done Automatically

Generate country-specific forms—phytosanitary certificates, bills of lading, invoices—**Stay compliant, save time, and expand into new markets with ease.**

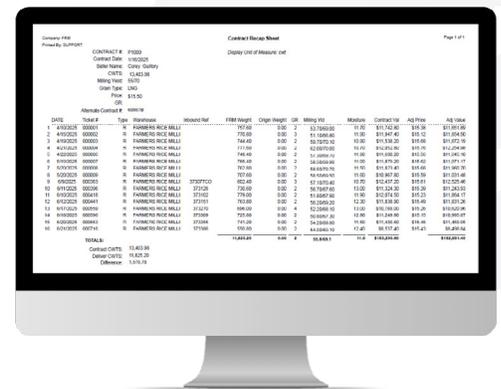

Rice Recap Reports

Visualize contract fulfillment and delivery trends by grower, contract type, or date range.

Know what's been delivered, paid, and pending—and where your best margins live.

CMS ADVANTAGE: RESULTS THAT MATTER

- Reduce intake time & eliminate paper tickets
- Streamline farmer settlement & invoice accuracy
- Improve head rice recovery & monitor by-product ROI
- Stay compliant with HACCP & export regulations
- Scale operations confidently with better data & fewer bottlenecks

Ready to Modernize Your Mill?

Let's bring your operations into the future—with the only CMS that's truly rice-ready.
