

# Truck Turn Optimization

Plant intake delays are one of the industry's biggest drains—driving up hauling costs, wasting driver hours, and disrupting plant operations.

## THE SOLUTION

Ever.Ag's TTO identifies the least-cost path to faster intake by using real plant data, benchmarking, and advanced modeling—avoiding costly guesswork.

## HOW WE DO IT

- Map intake processes and track real truck times
- Benchmark against best-in-class plants
- Model multiple improvement options with 3D simulation

## THE RESULTS

- Millions in annual savings for plants of all sizes
- 10–50X ROI on project costs
- Dramatically reduced wait times
- Smarter fixes without unnecessary capital spend

**Resolve intake bottlenecks once and for all.**
